

THE NEW ECODOWN® FIBERS COLLECTION: NOW FROM SUPER PUFFY TO ULTRA LIGHT

Thermore entered the free fiber market with a bang in 2018 with the original **Ecodown® Fibers** line- the industry finally had a free fiber product that offered softness and warmth- but with excellent durability.

In 2019 Thermore added color to the mix, and **the wide success lead to opening a new factory in Asia** to keep up with demand. Moreover, in order to guarantee quality of the finished products, Thermore launched the Ecodown® Fibers **Factory Audit System**, with more than **200 vendors** in Asia being audited as of today.

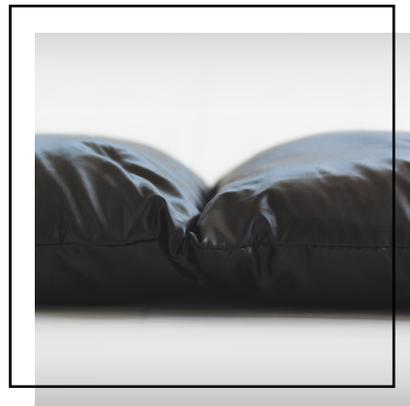

Thermore firmly believes that **blow-in fibers represent the future** of the insulation market, and using Thermore's advanced technology and know-how will be the key for the success of this category.

"It is now time to bring the free fiber platform to the next level", says a Thermore spokesperson. **"Thermore is the first global insulation company in the world to expand blown-in fibers into a full collection, to fulfill most of designers' needs and even dreams."**

The new expanded offer now includes the revolutionary **Ecodown® Fibers 2.0**, a super puffy blown fiber product suitable for wider baffle widths (up to 20cm). It offers **amazing loft and visuals** that are unmatched in the industry- still **Thermore's proprietary technology regulates the warmth** and avoids over-heating, thus keeping users comfortable.

Ecodown® Fibers Light

Ecodown® Fibers Light

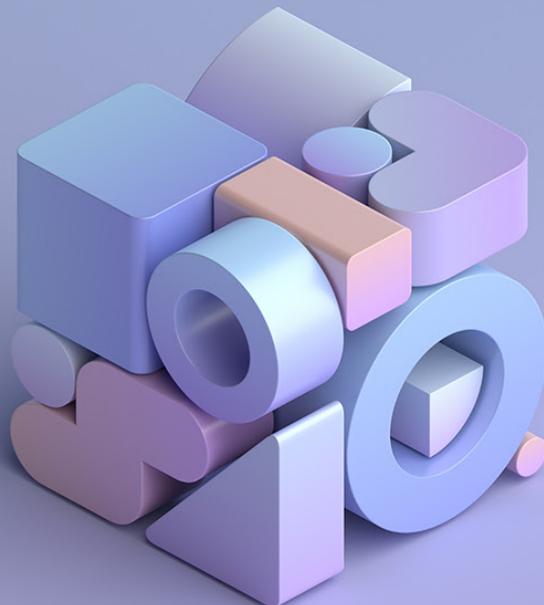

On the opposite side of the spectrum, Thermore is launching the innovative **Ecodown® Fibers Light**, which delivers an **extremely soft, yet ultra light free fiber insulation** that is 20% warmer than comparable products. Ecodown® Fibers Light is also **highly packable**, which makes it ideal for people on the go.

And of course, all Ecodown® Fibers are designed to be **resistant to clumping**, and they are **made of 100% recycled fibers from PET bottles**.

When you add it all up, Thermore is offering **a full-force product line with 5 different free fibers items**. This new Collection of Ecodown® Fibers products has evolved to meet the specific needs of various markets and offers something for everyone.
