ITALY: Thermore's latest insulation "light as air"

By Leonie Barrie | 17 June 2013

Thermal insulation specialist Thermore has launched a new line of thermal padding for ultra-light garments.

Thermore Aria is "made of 98% air," the company claims, making it voluminous yet light and ideal for contemporary garments. It uses certified Oeko-Tex raw materials, making it non-allergenic, highly breathable, non-toxic and free from PFOA and PFOS (perfluorooctanoic acid and sulfonate).

Thermore has operations in Europe, the US and Asia including production facilities in Thailand and offices in Hong Kong.
